SIGNATURES AND NOTARIES MUST BE ORIGINAL

Notary seals must not cover any text on the document. An Oregon Notary Seal that is blurred or faint is not acceptable for recording (OAR 160-100-000).

LANGUAGE:

ORS 192.310 Documents submitted for recording shall be in the English language.

LEGIBILITY REQUIREMENTS:

When an illegible document is presented for recording, the person presenting it will be required to substitute a legible original document or prepare a transcript to be recorded with the illegible document with the illegible document, otherwise the illegible document will be rejected. ALL ILLEGIBLE DOCUMENTS (such as a FAXED form) WILL BE REJECTED when the text maybe made out but not sufficiently legible to reproduce a readable photographic record.

**If the legibility of an instrument or notary seal is questionable and a deadline may be compromised should the county recorder reject the instrument, we suggest that you correct or prepare a new, legible original prior to submitting it for recording. We understand that fixing or preparing a new original may not always be possible due to clients demands; however, the client should be informed beforehand that the legibility problem exists and may cause the instruments to be rejected, prolonging the delay.

ORS 205.320 (12) **FOR RECORDING ADDITIONAL TRANSACTIONS** on assignments, releases, satisfactions, tax deferred property liens, municipal assessment liens, county assessment liens, or of any recorded instrument, \$5.00 for each additional instrument being assigned, released or satisfied. Also, documents establishing a lien will now be charged \$5.00 for each additional lien being established after the first.

ORS 93.610 RECORD OR FILE ANY DOCUMENT REQUIRED or PERMITTED BY LAW

Reject odd documents that do not have any recording authority. The customer has the responsibility of citing the ORS, Ordinance or Administrative Rule on the document that allows the document to be recorded. Affidavit of Heirship has no recording authority.

2021 On-Site Fee Schedule Important Points

Services

Important Points

- The BVD is not intended to apply to alterations or repairs to existing buildings. Because the scope of alterations or repairs to an existing building varies so greatly, the Square Foot Construction Costs table does not reflect accurate values for that purpose. However, the Square Foot Construction Costs table can be used to determine the cost of an addition that is basically a stand-alone building which happens to be attached to an existing building. In the case of such additions, the only alterations to the existing building would involve the attachment of the addition to the existing building and the openings between the addition and the existing building.
- For purposes of establishing the Permit Fee Multiplier, the estimated total annual construction value for a given time period (1 year) is the sum of each building's value (Gross Area x Square Foot Construction Cost) for that time period (e.g., 1 year).
- The Square Foot Construction Cost does not include the price of the land on which the building is built. The Square Foot Construction Cost takes into account everything from foundation work to the roof structure and coverings but does not include the price of the land. The cost of the land does not affect the cost of related code enforcement activities and is not included in the Square Foot Construction Cost.
